Meteor strike = (ಠ_ಠ). Worst game ever bought. How do I download mods with it on steam, just seems complicated. It's very good about setting a creepy atmosphere. There are plenty of monsters with their own quirks to learn, the mechanics feel solid, and the motion controls felt very fluid.

It's defiantly worth the \$10 and I plan to scare the♥♥♥♥♥out of some friends by forcing them to play this game.. This game is one of the best games to play with friends. Well, I used to have friends, but i shot one with a bazooka. Then I decimated the others with a flatulent grandmother, and I finished the rest off by litterally pooping on them with a poop airstrike. 10/10

Played with 3 other friends after buying the four pack. All of us discovered we were not having fun very swiftly into the game.

The game modes shift around at a rate that's very, very difficult to adapt, the sound feels very flat which results in certain mechanics such as the rocket and punch feeling extremely flat or lack luster.

I think this would take a lot of work and time in early access to transform into something I'd want to play again.. Its serious sam why do you need to read reviews for

JUST BUY IT. Deported 2 is a Pac Man style game with funny jabs at Clinton and Trump. The gameplay and story are great as they are in all of their games. It's definitely worth getting.. enjoyable game, has great music & story. just needs multiplayer and it'll be decent.. Solid Dungeon Crawler. Obviously a garage made product, but solid.

Levelup is disappointing.

Legend of Grimrock still is better.

9,99 Euros is too much.

Mixed feelings how to rate the product but giving thumbs up to encourage devs.
